TIPS FOR MAKING YOUR HALF PAGE OF THE MEMORY BOOK LOOK BEST WHEN PHOTOCOPIED:

Fill the entire box with photos and bio text (you may want to copy this template page incase you want a practice template) .

Use clear close up original photo/s (not copies) that will copy well into black and white as well as a clear readable font or neat printing for your bio text.

Test your completed template on the middle setting of a copy machine to see if what you have created comes out too dark or too light. Make your name stand out in the box, but do not include personal contact information.

Choose photos wisely since the photos in your template CANNOT be returned.

Use adhesive or tape that will allow your template to arrive just as you created it, but not show in the box. Protect your page for mailing.
